

Health care. Human care.

QA Qualification/Validation Officer (Ref: QVO1122)

Rafarm, achieving dynamic growth since its foundation (1974), is a Greek interest pharmaceutical industry of multinational orientation - with innovative medicines, branded generics and total quality services – recognizable by all stakeholders in the field of Health Care. At the forefront of Greek pharmaceutical companies continues to strengthen and build on its already important role as a serious and recognized player in the international market.

The role main accountabilities will be the following:

- Implements the calibration plan and validation master plan for process equipment
- Prepares the validation reports, protocols and participates throughout these activities
- Identifies the deviations and participates in the investigations related to initial or requalification activities
- Execution of reliability validations. Collects the results of the audits in order to prepare or control the reliability validation reports
- Monitors the preventive maintenance program in order to coordinate re-evaluations
- Liaises with the technical department regarding maintenance issues and investigates whether the equipment, system or facility is affected

Experience & Qualification Standards:

- University or technical degree in engineering or relevant scientific discipline
- Minimum of 1 year of relevant experience in a Quality Assurance or Technical department at a pharmaceutical manufacturing industry
- Highly detail-oriented and organized, able to work both independently and as a team player with a positive attitude
- Fluent in English and MS office proficient
- Self-motivated, flexible, and adaptable

The Company offers: Competitive remuneration package along with challenging career development opportunities within an innovation orientated organization
