

Health care. Human care.

Microbiological Laboratory Analyst (Ref: 112022)

Rafarm, achieving dynamic growth since its foundation (1974), is a Greek interest pharmaceutical industry of multinational orientation - with innovative medicines, branded generics and total quality services – recognizable by all stakeholders in the field of Health Care. At the forefront of Greek pharmaceutical companies continues to strengthen and build on its already important role as a serious and recognized player in the international market.

The role main accountabilities will be the following:

- Responsible for conducting raw materials, water testing, in process, semi finished product and stability microbiological testing according to standard operating procedures (bioburden, sterility testing and BET testing).
- Perform equipment maintenance and calibrations as required
- Completes appropriate documentation supporting testing procedures, including data capture forms, equipment logbooks, and inventory forms
- Supports preparation of validation protocols, executes experiments, and provides data for validation reports
- Executes/supports microbiological sampling procedures regarding the water system, utilities and clean room facility.
- Understand and comply with all company policies, safety procedures, and SOPs, including cGMPs and cGLPs.
- Maintain a level of technical knowledge and understanding in the assigned areas of responsibility that are consistent with the current scientific requirements of the company

Experience & Qualification Standards:

- BSc in Biology, Health Science School or relevant scientific discipline
- Fluent English is required
- Minimum of 1 year of relevant hands-on laboratory experience in the Biotechnology/Medical Device/Pharmaceutical manufacturing laboratory industry
- GLP / GMP oriented laboratory experience will be considered as a plus
- Highly detail-oriented and organized, able to work both independently and as a team player with a positive attitude
- Excellent observation skills and problem solving abilities
- Ability to follow analytical procedures and protocols
- A methodical, investigative and inquisitive mind

The Company offers: Competitive remuneration package along with challenging career development opportunities within an innovation orientated organization
